

Amber for pharmaceutical packaging

Cut costs with Sukano color masterbatches!

As an economical alternative to the PET compounds currently found on the market Sukano has developed a new masterbatch for the production of amber-colored pharmaceutical containers. An extensive development and test programme has resulted in a high quality, high purity product to meet the most demanding visual and technical requirements. Well-known

test organisations have confirmed the suitability of using this transparent product, known as SUKANO® T cc T4337-50-SP, in pharmaceutical packaging in line with the European Pharmacopoeia and USP Class VI. In contrast to the compounds that are commonly used in the market, SUKANO® Amber Masterbatch offers massive cost-savings with identical

Sukano - the company

“Sukano Creative Solutions” means value-added applications, characterised by innovative research and development, individuality and versatility.

Sukano is a company with its origins firmly rooted in the development of functional masterbatches, so that today the Sukano team has built up a high level of technical expertise, still focused in particular on functional and optical enhancing products, complemented by a wide range of colors.

high performance characteristics. Although Sukano originally developed the amber masterbatch specifically for pharmaceutical applications, it is eminently suitable for use with other sensitive products in the foodstuffs, toys and cosmetics sectors. Information on further approvals can be found in the accompanying table.
