

Driven by expertise

Masterbatches for Thin Films & Coatings

Thin Films & Coatings

Partner with
the pioneer
manufacturer of
state-of-the-art
PET additives
masterbatch

Proven game-changing expertise

Work with the pioneer manufacturer of state-of-the-art PET additives masterbatch, that have been continuously changing the way converters overcome production and processing challenges on PET and PA based thin films for more than 30 years.

The orientation of thin films in one (monoaxial) or two (biaxial) directions provides unique properties for downstream processing and applications.

Sukano's legacy products in these areas have supported our satisfied customers throughout the value creation process for sustainable innovation.

Processing benefits

- Optimum asset utilization, leading to reduced operational costs
- Improved twist wrapping line speed
- Winding and unwinding films significantly improved
- Excellent adhesion and release characteristics
- Outstanding printability
- Very high quality material to avoid line stops and film breaks
- Broad recyclability experience for higher RPET contents in the process
- Amorphous and crystalline tailored products
- Very low filter value as part of minimum quality standards for superior dispersion
- Stable melt that allows speed up of the casting process
- Multiple visual aesthetics effects on demand

Applications benefits

- High quality masterbatches to support downgauging
- Superior mechanical strength
- High opacity levels at low dosages
- Dimensional stability at elevated temperatures
- Maximum decrease on coefficient of friction (COF)
- Resistance to abrasion
- Above-market standard performance on optical clarity
- High heat seal strength
- Total gloss/matt control without liquid coatings
- Long life outdoor applications with prime weathering performance

Proven high performance

An impressive set of performance data is available to help customers choose the best product to meet each of their specific requirements. Our additives are carefully selected and its applicability is tested both in the field and according to industry standards.

Partnership benefits

Flexible and direct accessibility to our labs:
At Sukano, all our marketed offers and products undergo extensive testing at our state-of-the-art analytical labs, and are supported by industrial trials with test results evaluated with customers.

Driven by expertise

Sukano's meticulous and precise formulation approach enable customers to use the latest high-end technology

It is the proximity to our customers and our performance capabilities that are the true reasons for the trustworthy reputation we both own and owe to the market.

Discover Sukano's portfolio

Sukano's masterbatches enhance productivity, increase functionality, improve aesthetics and enable recyclability in the following markets and applications:

- Bottles & Containers
- Thin Films & Coatings
- Thick / Rigid Films
- Sheets
- Fibers & Filaments
- Biopolymers
