

KASUNO

Driven by expertise

Masterbatches
for Fibers &
Filaments

Achieving your objectives is our goal!

Sukano's unique and highly technical portfolio is available to support your challenges in the ever-dynamic yet traditional textile business.

Sukano's masterbatches modify and enhance the performance of your products. You can benefit from our expertise in masterbatches for fibers and filaments to achieve true differentiation in the market.

Fibers & Filaments

Enhance your product's performance

Working with Sukano means:

- Trustworthy partnership for your projects
- Competitive processing advantages
- High-performance products with patented technology
- Distinguished brand recognition
- Flexibility and agility to design any formula
- Tangible innovation that elevates the value of your product

A high-tech portfolio...

Sukano's selective portfolio of masterbatches and compounds meets a wide range of product requirements in applications ranging from monofilaments to multifilaments.

The end products surpass technical yarns and nonwovens, as well as upholstery, sportswear apparel, automotive interiors, and technical fibers for both personal and industrial uses.

...and much more!

Our products are used worldwide and are recognized for their quality, consistency and reliability. Our best manufacturing practices and processes are an integral part of our core deliverables to our customers, and all our activities are supported by an experienced team of experts.

Functional products

Enhance productivity and increase functionality:

- UV masterbatches
- Antimicrobial
- Security additives

Optical products

Add beauty and improve aesthetics:

- White masterbatches
- Black masterbatches
- Optical brighteners

Biobased products

Optimize processes and enable recyclability:

- Optical brighteners
- Nucleating agents
- White masterbatches
- Antistatic agents

Textiles depend on the functionality of their fibers. Custom engineering functionality, performance and processing directly into the fibers can help optimize significant manufacturing costs. When the desired properties are integrated into the fiber, subsequent processing and finishing steps can be eliminated.

Production is faster – and with less rejects. The durability and usability of the final product is also extended. Sukano's portfolio is designed to work on two fronts: production efficiency to minimize costs; and added functionality to maximize end product perceived value.

Driven by expertise

Take full advantage of Sukano's expertise and dedication to fibers. We are your global partner of choice!

Discover Sukano's portfolio

Sukano's masterbatches enhance productivity, increase functionality, improve aesthetics and enable recyclability in the following markets and applications:

- Bottles & Containers
- Thin Films & Coatings
- Thick / Rigid Films
- Sheets
- Fibers & Filaments
- Biopolymers
