Schindellegi Switzerland, February 1, 2024 - Sukano, a global specialist in additive and color masterbatches and compounds for polyesters, biopolymers, and specialty resins, is thrilled to announce the successful acquisition of the majority stake in Kays Kft., a Hungarian company specializing in compounding engineering plastics using recycled content.

This exciting development marks a significant milestone for both companies, creating a synergistic alliance that unlocks new growth opportunities. Both entities will continue their operations independently, ensuring a seamless transition for all stakeholders involved.

Sukano's decision to acquire Kays is rooted in the shared vision and strategic alignment of the two companies, complementing the other perfectly in terms of the markets they serve. While Sukano holds a strong position as a leading supplier in packaging and has been expanding its reach into consumer durables, building & construction, fibers, and healthcare markets, Kays brings a specialized focus on the automotive, E+E, and railway markets. This complementary pairing combines strengths and capabilities, broadening the scope of expertise and service the Sukano group can offer.

At the core of both companies is an unwavering commitment to customer satisfaction, delivering cutting-edge technology, customized masterbatch and compound solutions, and top-tier services. With their technical knowledge and market insights, the companies offer unparalleled service for a wide range of industries and customers.

Both companies are committed to sustainability, designing products that keep plastics in the loop longer. While Sukano develops products that optimize the properties of recyclates to allow higher use of recycled content in plastic applications, Kays engineer compounds that contain significant amounts of recycled content (PIR/PCR). Both continue to drive innovation to support a Circular Economy.

### About Sukano

Sukano is a global specialist in the development and production of additive and color masterbatches and compounds for polyesters, biopolymers, high-temperature polymers, and specialty resins.

The company is driven by expertise and devotes its technical knowledge to developing highly specialized products and services that go into packaging, consumer durables, building and construction, healthcare and fibers.

The company is a family-owned business headquartered in Switzerland, operating additional manufacturing facilities in the USA, Malaysia, and Hungary, as well as a sales office in Shanghai.

Sukano is able to leverage its global knowledge base to provide outstanding local support, creating additional value for customers through flexibility, reliability, technical expertise and agility.

The pioneering and entrepreneurial spirit that the company was founded upon continues to this day. Sukano strives to be part of a larger mission by becoming the global partner of choice for plastic converters and brand owners, driving innovation through partnerships and collaborative product development.
